District-based NRM Groups provide an essential link between the community and the SA Arid Lands Natural Resources Management Board.

**OUR NRM GROUP MEMBERS**

The majority of Group members live in the district or are involved in NRM in the area. They provide a local perspective on implementing projects and the development of relevant priorities for the region.

Community members involved at this level are a vital, practical link for the communities they represent to ensure projects are relevant to local issues.

Groups are skills-based with members selected based on their knowledge of one or more of the following areas:

- Community affairs at a district level
- Primary production or pastoral land management
- Soil conservation and land management
- Water resource management
- Business administration
- Local governance or administration
- Aboriginal interest in the land and water, and Aboriginal heritage
- Pest animal and plant control
- Natural and social science
- Mining and petroleum industries
- Tourism

**If you have an interest in the natural resources in your LOCAL area, becoming an NRM group member may be for you**
